

Safety Data Sheet

Product and Manufacturer Information

Name: 26-0-0 w/ Boron

Synonyms: urea-triazone solution with Boron, reacted nitrogen fertilizer, etc

Recommended Use: Turfgrass or Agricultural fertilizer

Manufacturer: Morral Companies, LLC; P.O. Box 26, Morral OH 43337. Phone: 740-465-3251

For Transportation Emergencies call Chemtrec at 800-424-9300

For Other Emergencies call 911 and/or Appropriate Regulatory Agencies

Hazard Identification

GHS Classification: none

This material does not present any unusual hazards under ordinary conditions. Use general precautions when handling, transporting, and storing this material.

Composition / Information on Ingredients

Component	CAS #	% (w/w)
Urea	57-13-6	12
Urea-formaldehyde polymer	9011-05-6	33-43
Disodium Octaborate Tetrahydrate	12280-03-4	2
Water		43-53

First Aid Measures

Skin Contact: The material may be especially irritating to cuts, abrasions, and open wounds. If exposure occurs, rinse the affected area thoroughly with water. Treat other irritated areas by washing with soap and water.

Eye Contact: Minor irritation is likely if exposure occurs. Rinse eyes thoroughly with water for 15 minutes. Remove contacts if necessary. Seek medical attention if irritation persists.

Respiration: Remove to fresh air and seek medical attention. Inhalation of any liquid or mist may result in breathing difficulty.

Ingestion: Swallowing large amounts may result in vomiting, diarrhea, cramps, and other gastrointestinal disturbances. Dilute stomach contents with water. Seek medical attention.

Fire Fighting Measures

Flash point: >200F

Extinguishing Materials: All standard agents are acceptable.

Special Hazards and Precautions: irritating fumes may be evolved at elevated temperatures.

Accidental Release Measures

Do not allow to enter drains waterways, etc. Contain large spills by diking with soil or other material. Small spills may be covered with an absorbent material. Do not dilute with water or use water to flush material to another location. For uncontrolled or major releases, response by trained personnel using preplanned procedures is recommended. Refer to Exposure Controls / Personal protection to determine proper PPE. Consult applicable regulatory agencies for spill reporting and disposal.

Safety Data Sheet

Handling and Storage

Standard conditions are generally acceptable. Long term storage may result in settling of solids, formation of crystals, and/or insoluble polymers. Avoid storage or transfer using copper bearing, zinc-clad, or aluminum vessels or equipment.

Exposure Controls / Personal Protection

Skin exposure should be kept minimal by wearing gloves, long pants, and long sleeved shirts. If splashing may occur, wear protective goggles. Ingestion and respiration of the material are unusual occurrences under typical conditions of use.

Physical and Chemical Properties

Appearance: clear to slightly hazy, colorless liquid

Odor: none to slight ammonia

pH: > 8.0.

Freezing Point: ~32F

Boiling Point: ~212F

Solubility in Water: complete

Density: 10.2 lbs/gal (1.22 g/ml)

Stability and Reactivity

This product is stable under normal use and storage conditions. This product is not a reactivity or polymerization hazard. It will form insoluble polymers if stored for long periods or at lowered pH.

Toxicological Information

This material is not known to be a toxicity hazard to animals or humans. Chronic exposure to formaldehyde, that may be present in this material, has been linked to cancer, but at exposure levels far greater than those attainable through this product.

Ecological Information

Boron, while a necessary plant nutrient, can be harmful in high quantities. Root absorption to toxic levels is easily attainable. Care should be taken not to exceed recommended application rates, and following spill cleanup, be aware of the potential of harm from residual product. Boron and all other ingredients incorporate into natural environmental and biological processes.

Disposal Considerations

This material is not defined as a hazardous waste by the U.S.E.P.A. Dispose of this material as recommended by federal, state, and local regulations. Disodium Octaborate Tetrahydrate is considered in the State of California as a hazardous waste.

Transport Information

This material is not regulated as a hazardous material by the U.S.D.O.T. Use normal transportation safety precautions.

Safety Data Sheet

Regulatory Information

SARA Title III Hazard Class: not considered a hazard
CERCLA Reportable Quantity: not applicable.
TSCA: not regulated
RCRA Hazardous Waste Classification: not regulated

Additional Information

Revision 1, prepared 25 March 2015
